

CS2020B Current Booster

CS2020B current booster can be used with model CS350 single channel potentiostat/galvanostat. This combination can be applied in the field of fuel cell, soft pack battery, battery core testing, electroplating etc. The maximum current output is $\pm 20A$.

CS350 can be used alone as ordinary single channel potentiostat, and can also be used with CS2020B booster.
